VSNSERVICES

Bring you the latest technological innovations for business success!

Company Profile

About VSN SERVICES

VSN SERVICES Technologies Pvt. Ltd. is a leading provider of comprehensive Information Technology and Systems Integration Solutions to esteemed organizations worldwide. Since its establishment in 2010, VSN SERVICES Technologies has strived to create strategic partnerships with renowned global brands, solidifying its position as a trusted Total IT Solution Company.

At VSN SERVICES Technologies Pvt. Ltd., we are dedicated to offering complete IT solutions that empower businesses to thrive in today's competitive landscape. We understand that success in the digital age requires a comprehensive and integrated approach to technology, and thus, we have forged alliances with top industry vendors to provide specialized IT products and solutions on a global scale.

Our Vision

At VSN SERVICES Technologies Pvt. Ltd., our vision is to be the foremost provider of End-to-End Information Technology and Systems Integration Solutions, setting new benchmarks for excellence in the global IT industry. We aspire to be recognized as the trusted partner of choice for organizations seeking comprehensive IT solutions that drive innovation, efficiency, and sustainable growth.

Our Mission

At VSN SERVICES Technologies Pvt. Ltd., our mission is to provide End-to-End Information Technology and Systems Integration Solutions that empower organizations globally to optimize their operations, enhance competitiveness, and drive sustainable growth.

Our Values

Customer Satisfaction: We prioritize the needs of our clients and strive to exceed their expectations through exceptional IT solutions.

Integrity and Ethics: We conduct business with the highest standards of integrity, honesty, and ethical practices.

Excellence and Innovation: We pursue excellence and foster a culture of continuous learning and innovation.

Collaboration and Partnership: We believe in the power of collaboration and actively seek partnerships with industry vendors and technology leaders to deliver comprehensive and integrated IT solutions.

① PROFESSIONAL SERVICES:

VSNServices's Professional Services offers a team of technical experts and project management professionals to help you maximize your investment in information technology. VSN SERVICES experienced team offers a variety of professional services from consulting to deployment designed to help you realize a faster time to value. Our Professional Services include:

Microsoft Services

›   **Design & Development of Microsoft Unified communication Solution (Skype for Business).**
›   **Migrating existing windows infrastructure to latest/updated windows environment.**
›   **Migrating Legacy Exchange environment to latest on-Prem, Office 365 or Hybird.**
›   **Design & Development of Microsoft Windows Server Infrastructure Services.**
›   **Disaster Recovery of Microsoft Infrastructure, VMware to Microsoft Azure.**
›   **Disaster Recovery of Microsoft Infrastructure, Hyper-V to Microsoft Azure.**
›   **Designing & Implementing Microsoft Messaging (On-Prem & Office 365).**
›   **Design & Implementation of Microsoft SharePoint Server infrastructure.**
›   **Design & Development of Microsoft Azure cloud platform Solution.v**
›   **Design & Development of Microsoft private cloud Solution.**

VMware Services

›   **Assessment of VMware virtual/Hybrid Cloud Infrastructure with vRealize operation manager.**
›   **Design & Implementing of Cloud Management & Automation.**
›   **Design & Implementing of Data Center Virtualization.**
›   **Design & Implementing of Network Virtualization.**
›   **Design & Implementing of Site Recovery Manager.**
›   **Design & Implementing of Desktop & Mobility.**
›   **Citrix Optimized Server Virtualization.**

1 PROFESSIONAL SERVICES (Cont.):

Citrix Services

- Design & Implementation of Citrix mobility solution for device management.
- Upgrading/Migrating legacy Citrix infrastructure to latest available release.
- Design & Implementation of Citrix infrastructure for best practices.
- Design & Development of XenApp/XenDesktop 7.x infrastructure.
- Development of Citrix infrastructure in Microsoft Azure & AWS.
- Support services for Citrix infrastructure.

Cisco Services

- Design, Development & troubleshooting Security Appliance (ASA, Firepower, Palo Alto, Fortigate etc.)
- Configuring SSO Security (Authenticated Solutions with Palo Alto, Fortigate, Sophos & Firepower).
- Design, Development & troubleshooting Cisco Datacenter series Switches (Nexus & ASR).
- Designing & Configuring QOS to make network optimization and well responded.
- Configuring VPNS (IPSEC, Remote Access, Get VPN, DMVPN, FLEX VPN etc.)
- Design, Development & troubleshooting of Cisco IP and Security networks.
- Development of NMS systems (Solar winds, PRTG, Manage Engine).
- Designing & Configuration of protocols L3 (BGP, OSPF, EIGRP etc.)
- Design & Implementation of Cisco Unified Computing System.
- Maintenance & Support services with technical trainings.
- Design and Installation of Structured cabling.

DELL / EMC Storage Services

- Design & Development of Recovery point appliance for array based data protection.
- Design & Development of EMC VNX/VNXe series storage systems.
- Development of EMC Networker for backup/recovery solution.
- Design & Development of EMC unity series storage systems.
- Development of DELL storage PS Series (Equallogic).
- Design & Implementation of SAN fabric Switches.
- Development of DELL PowerVault MD3 Series.
- Development of DELL storage NX series.

2 MANAGED IT SERVICES:

Through our range of Managed IT Services our goal is simply to enable you to make the best use of IT in your business within available budgets. VSN SERVICES flexible approach means that we can undertake a full outsource of your IT, or work in a co-source capacity alongside your existing teams and service providers. Whether you're looking for financial savings, service quality improvements or skills coverage, we're confident that our services will exceed expectations in every area. Our Managed IT Services include:

o   Service Desk Support
o   Infrastructure Management
o   Service Management

Service Desk Support

VSN SERVICES as a Service Desk is a 24/7/365 manned operation delivered from our Operations Centre. We are experienced in transitioning and supporting 1st to 'n'th generation outsourcers and recognize the 'leap of faith' required on the part of the customer.

o   Enterprise-ready 24/7 service
o   Extensive remote support and management capabilities
o   Highly skilled Service Desk engineers
o   Enterprise class IT Service Management System

Infrastructure Management

No business underestimates the criticality of keeping their server and network infrastructure up and running. In many cases when server/network outages or service degradation occurs it can prevent your entire business from operating.
VSNServices's provide a comprehensive Infrastructure Management service that maximizes uptime and ensures that your systems and applications, be they on-premise, hosted, or Cloud based, are optimally configured for performance.

Service Features:
o   Support (technical resource is available 24/7 to address issues rapidly and prevent/reduce downtime).
o   Monitoring (Keeping a comprehensive eye on the availability, performance and health of your systems and applications. When issues occur we identify and address them rapidly. Reports are generated monthly and analyzed by our team to ensure developing trends are captured).

Service Features:

o   Support (technical resource is available 24/7 to address issues rapidly and prevent/reduce downtime).
    Management (broken down as):

o   Configuration (Ensuring appropriate configuration of your infrastructure and adapting it as your requirements develop and change).

o   Administration (Assuming the role of the old-fashioned Systems Administrator. Undertaking frequent housekeeping routines to ensure that you're getting the best from your systems and applications).

o   Optimization (Continually assessing the configuration and performance of your systems and applications to ensure optimal performance and usability).
    Broad range of technical capabilities and accreditations covering Microsoft, Cisco, Linux, Citrix, VMware, Apple and many more.

Service Management

Service Management is the core of the VSNServices's Managed IT Services. The VSNServices's service experience is underpinned by our Enterprise-class IT Service Management system which captures and provides the necessary business intelligence upon which we can make informed decisions to improve your systems and services. This analysis is presented in our monthly report pack.

Service Features:

o   Strategic guidance to help define your IT roadmap
o   Shared experiences from other customers to help inform your business decisions
o   Continual Service Improvement Programmed
o   Informative monthly reporting pack demonstrating service performance

3 CORPORATE TRAININGS:

IT Training is an integral part of improving the competence of your resources. VSNServices's understands that corporate training is distinct from academic or professional training programs, as the training which needs to be delivered to corporate is highly customized and specific to meet the set objectives of the organization.
With clients in various industries, VSNServices is at the forefront of delivering specialized corporate trainings, and developing training courses for diverse software platforms.

o   Microsoft Product Trainings
o   Cisco Trainings
o   VMware Trainings
o   Citrix Trainings

Our Achievement & Certifications

vmware®

- VMware Certified Advanced Professional (VCAP-DCV Design)
- VMware Certified Professional (VCP-DTM - 8.x)
- VMware Certified Professional (VCP-CMA 8.x)
- VMware Certified Professional (VCP-DCV 7.x)
- VMware vSphere 6.5 Foundations

citrix™

- Citrix Certified Expert - Virtualization
- Citrix Certified Expert - App Delivery and Security.
- Citrix Networking for Data Center Specialist Practicum
- Citrix Virtual Apps and Desktops Service on Citrix Cloud
- Citrix Certified Professional App Delivery and Security
- Citrix Certified Associate App Delivery and Security

DELL EMC

- Implementation Engineer, PowerStore Solutions
- Specialist Implementation Engineer, VxRail Appliance Specialist
- Converged Systems and Hybrid Cloud Associate
- Information Storage and Management Associate
- Implementation Engineer, Symmetrix Specialist
- Platform Engineer, Symmetrix Specialist
- Implementation Engineer, RecoverPoint Specialist
- Implementation Engineer, VNX Specialist
- Implementation Engineer Network Attached Storage Specialist
- Implementation Engineer, VPLEX Specialist
- DELL Servers - PowerEdge M1000E Product Certification(DCSE)

Microsoft

- Microsoft Certified Trainer
- Microsoft Certified: Azure Solutions Architect Expert
- Microsoft Certified: Azure Virtual Desktop Specialty
- Microsoft Certified Solutions Expert: Private Cloud
- Microsoft Certified Solutions Expert: Productivity
- Microsoft Certified Solutions Expert: Server Infrastructure

CISCO

- CCIE Routing & Switching
- CCNP Routing & Switching
- CCDP Architecture
- CCNA Routing & Switching
- CCNA Wireless
- Enterprise Network Core and WAN
- Essentials (ENCWE)

veeAM

- Veeam Certified Engineer 2021 (VMCE 2021)

NetApp

- NetApp Systems Engineer Professional

Skills Matrix

Category	Sub Category	Skills
Microsoft	Azure IaaS	Design, Deploy, Migration & Manage
	Azure Virtual Desktop	Design, Deploy, Migration & Manage
	Azure Migrate IaaS – On-premises to Azure	Design, Deploy, Migration & Manage
	Azure Site-to-Site VPN	Design, Deploy, Migration & Manage
	Azure as DR using Azure Site Recovery - ASR	Design, Deploy, Migration & Manage
	Microsoft Active Directory & Exchange	Design, Deploy, Migration & Manage
	Microsoft System Administration	Design, Deploy, Migration & Manage
Citrix	Citrix CVAD – On-premises	Design, Deploy, Migration & Manage
	Citrix Fedrated Authentication Service - FAS	Design, Deploy, Migration & Manage
	Citrix ADC, Load Balancing, Gateway, VPN, and MFA	Design, Deploy, Migration & Manage
	Citrix Infrastructure Upgrade	Design, Deploy, Migration & Manage
VMware	VMware infrastructure	Design, Deploy, Migration & Manage
	VMware Infrastructure Upgrade	Design, Deploy, Migration & Manage
	VMware Horizon & Horizon Cloud	Design, Deploy, Migration & Manage
	VMware Site Recovery Manager (SRM)	Design, Deploy, Migration & Manage
	VMware Cloud Foundation - VCF	Design, Deploy, Migration & Manage
	VMware VSAN - Software Defined Storage	Design, Deploy, Migration & Manage
	VxRail Cluster	Design, Deploy, Migration & Manage
	VxRail Cluster Upgrades and Expansion	Design, Deploy, Migration & Manage
Nautanix	Nutanix Storage Infrastructure	Design, Deploy, Migration & Manage
Veeam	Veeam Backup and Replication - VBR	Design, Deploy, Migration & Manage
	Veeam for M365 - VBO	Design, Deploy, Migration & Manage
	Veeam Backup for Azure	Design, Deploy, Migration & Manage
Servers & Storage	Cisco UCS	Design, Deploy, Migration & Manage
	Dell Servers	Design, Deploy, Migration & Manage
	Dell Storage (FC & iSCSI)	Design, Deploy, Migration & Manage
	NetApp Storage (FC & iSCSI)	Design, Deploy, Migration & Manage
	Nimble Storage	Design, Deploy, Migration & Manage
Documentation	Technical Content Writing.	Advance
